

PowerShell Terminal Cheat Sheet

Common commands for creating, navigating, and deleting files and folders in Windows PowerShell.

Task	Command
Create folder	<code>mkdir FolderName</code>
Enter folder	<code>cd FolderName</code>
Go back	<code>cd ..</code>
Show contents	<code>ls (or dir)</code>
Create empty file	<code>ni file.txt -ItemType File</code>
Create multiple files	<code>ni index.html, style.css, app.py -ItemType File</code>
Delete file	<code>rm file.txt</code>
Delete empty folder	<code>rmdir FolderName</code>
Delete folder with contents	<code>rm FolderName -Recurse -Force</code>

Example Workflow

```
mkdir DSA
cd DSA
mkdir Susmita
cd Susmita
mkdir husband
mkdir wife
cd husband
ni index.html -ItemType File
cd ..
cd wife
ni app.py -ItemType File
cd ..
rm husband -Recurse -Force
rm wife -Recurse -Force
cd ..
rm Susmita -Recurse -Force
```
